Supplies:
Scor-Pal®
6" x 6" Decorator Paper
Crop-a-dile (CAD)
Stapler
Ribbon

Step 1:
With right side up score your paper at 1", 3", and 5" right side up. Turn paper over score at 2" and 4". We need to alternate the scoring lines.

Step 2:
Accordion fold the paper as shown in photo. This is because we always fold with the score line to the outside of the fold.

Step 3:
Hold all folds together and cut each end in a slant as shown in photo. Fold in half.

Step 5:
Staple horizontally with the staple close to inner edge of the star. Look closely at the photo.

Step 6:
After you have stapled the middle, start to open your star, forming the first half of the star and stapling the edges together.

Step 7:
Do the same to the other side. This forms the second side of the star.

Step 8:
Use your CAD to punch a 3/16" hole in one of the star points. Set an eyelet in the hole. Knot a ribbon and insert the fold of the ribbon from the back.
