ALMA POWELL

27 MARCH 2013

WEDNESDAY

Dear Glina,

I wanted to pass on to you a couple of names that I believe may be helpful to our case:

[REDACTED] has been mentioned in two books I have read. She was or is an attorney in the FBI's Minneapolis office (she may have moved on. The books I saw her in were talking about an incident from 1993. One book was published in 1995, one in 2006). [REDACTED] testified to Congress, in essence, that FBI Headquarters suppressed an investigation in Minneapolis that could have blown the cover of terrorists who carried out the 9/11 attacks. Both the Minneapolis and Phoenix offices of the FBI reported, weeks before 9/11, that they were aware that suspect individuals were taking flight-training classes.

The other person I would like you to look into is [REDACTED] in Centennial, Colorado. She is one of the attorneys mentioned in an article I just read, who is representing [REDACTED] accused of killing 12 people and injuring 70 in

3/27/2013-1

Steve to Plina

a shooting that took place in a movie theater in Aurora, Colorado, on July 20, 2012.

You will recall that the shadowy character who called himself [REDACTED] on 7/31/2012, when he and FBI agent [REDACTED]

met with me in the WCC prison, said to me (with some glee, as I recall) that Michael was going to do the same thing as the guy in Aurora, Colorado. The first thing that concerned me was that I took his

[REDACTED] comment as a direct physical threat to Michael. The second most important thing that hit me that day

was, shortly thereafter, was that this [REDACTED] guy either had something to do with [REDACTED] psychotic episode, or he knows someone who was involved.

[REDACTED] said he was with Department of Defense (DOD), which could be experimenting with psychotropic drugs (the Air Force Academy, a university, is in Colorado Springs). Frankly, if someone in the military came out to the media and

3/27/2013-2 Steve to Alina

said, "We are not experimenting with such chemical agents," I would be totally Skeptical. We know that chemical agents are part of the program. There is a depot (I believe in Utah) whose sole purpose is to dispose of obsolete or expired chemical agents, mostly by burning. I have read about local community concerns in the last ten years.

We know who this [redacted] guy targeted Michael. [redacted] may be just an innocent bystander. I have tried to guess at a scenario, and it occurs to me that he may have inspired jealousy in a fellow graduate student who has access to chemical weapons, in this case psychotropic drugs. Or someone may have assaulted him by lacing his food or drink with such drugs, as we believe happened with Michael. Does [redacted] also have a connection to Newtown, Connecticut, where that guy went berserk and killed people in an elementary school?

The bottom line is, [redacted] defense attorneys have not entered a plea

3/27/2013-3 Steve to Alina

for him, probably because he does not have a history of mental illness they can point to. Clearly, if he was assaulted with something undetectable, that causes psychotic reactions in the way LSD or PCPs or meth do, he has no clue what hit him.

Please contact [redacted] defense team somehow, or get their address so that I can contact them, by mail. They need to know there is something more to this, possibly, than meets the eye. If they decide to investigate, it could uncover things that will help our case.

You could try to reach [redacted] family, but I know how reluctant we were to talk to anyone, believing there were crack pots on both sides of the issue.

The [redacted] trial is scheduled for August 5. The information we have is critical. It could mean life or death for [redacted]. August 5 is coming right up, and the attorneys have to enter a plea immediately.

3/27/2013-4 Steve to Alina

I am sure you know that Chuck Cox retired from the Air Force after at least 20 years, and as an FAA investigator is working with the same people as well as with FBI and other agencies, with whom he works on investigations. The question that [REDACTED] is, is there some reason someone in the Air Force would have for "getting even" with someone in the [REDACTED] family? Is there a connection there? Does the US Air Force "test" their chemical warfare weapons on American citizens by choosing guinea pigs from among people who get in their cross hairs for God-Knows-what reason?

What about [REDACTED], who is accused of killing 16 Afghans one tragic night, when he left his base in Afghanistan alone and went into the community?

I believe we and [REDACTED] defense team need to know who this Shamus-guy is, and demand a deep investigation into his contacts and activities. The question is, how do you get past the "Top Secret" wall, behind which our government and its agents can hide all sorts of

3/27/2013-5 Steve to Alina

wrongdoing? Investigators need to find out who [redacted] is, and look at all of his phone, email and travel records.

Sorry this is so long. If you are unable or don't have time to help me contact [redacted] defense team, and possibly [redacted] of Minneapolis, please find someone who will work with me on this, [redacted] [redacted] someone. I am willing to testify about [redacted] threats. My phone calls while in prison could be a resource. The three prison employees who sat in on the 7/31/2012 meeting may remember what was said. Maybe [redacted] can remember some anomalies in what he ate or who he spoke to the day of the Aurora tragedy.

Sorry this is so long. I would like to meet with someone from the [redacted] defense team. They could talk to the three prison staff while here. But they may brush this off as conspiracy theory or otherwise implausible. However I am only interested in helping another family who has "lost" their son. Love,
DAD
