

On 06-14-10 Detective Max Cook, Sgt. Robert Bowbrowski, and I responded to area of 123000 south I15 to check two small ponds located on the West side of the interstate. The victims' father Charles Cox had called and requested that this area be searched after he had observed a message/blog on the Salt Lake Tribune website. The message/blog was from a user named Lochkeeper and in the posting this individual stated that he had called the West Valley City Police Department with information about a suspicious van that was observed the night of Susan Powell's disappearance. The van was observed had two child seats inside and was parked on the side of the roadway near two ponds and this individual speculates that Susan Powell or evidence related to her case are located at this location. This information was researched and a copy of the Salt Lake Tribune has been added to this case. I did not locate any tip calls received with the above information, but it should be noted that there are several hundred tip calls still in line to be investigated and researched.

Detective Max Cook, Sgt. Robert Bowbrowski, and I searched around the two ponds but did not observe anything suspicious or items of evidence related to this case. This search was tracked using a handheld GPS unit, and the information has been downloaded and added to the case report along with the digital photos. On a future date yet to be determined, I will return to this location with a Forensic Cadaver Dog and have the area rechecked.
